

Project Name	Grower Communications	
Objective(s)	To provide information that assists growers in their decision-making and understanding of the wine industry; to communicate industry issues and developments, research outcomes and extension programs; to promote seminars, workshops and industry events.	
Project Description	<p>Murray Valley Winegrowers' Inc. (MVW) publishes four editions annually of MVW News & Views, providing information on winegrape supply/demand, market data (including export performance), research outcomes and application, viticulture developments, industry commentary and grower forums.</p> <p>MVW Easy Update is an email bulletin that is sent to growers whenever issues arise that demand timely communication - on average, seventy-five per annum are broadcast depending on requirements. This service gives MVW the ability to keep grower communications current, particularly for time-sensitive information during harvest or when natural disasters occur, such as hail and frost. The Easy Update bulletins also enable MVW to advise growers of upcoming workshops, forums etc. and Water Alerts (allocation & price information)</p> <p>MVW also presents an annual Growers' Information Forum, with expert speakers who report on current issues of relevance to the wine industry, e.g. industry outlook, market conditions, water markets and viticulture management.</p> <p>The MVW website www.mvwi.com.au is vital to the communications process, giving growers easy access to a vast selection of information that is helpful to vineyard and business management. The website is a shared resource with the IDC. SMS texting is also used as a means of promoting workshops and other grower-related events.</p>	
Project Results	<ol style="list-style-type: none"> 1. Generate greater grower awareness and understanding of the issues that affect the wine industry and winegrape businesses 2. Generate greater understanding of winegrape market conditions 3. Informed decision-making for vineyard businesses

Project Name	Information Collection and Database Management	
Objective(s)	To keep growers informed of industry trends in the areas of domestic and export wine sales, grape pricing data, wine grape supply/demand and market projections to facilitate informed commercial decision-making.	
Project Description	<p>Murray Valley Winegrowers (MVW) is required on growers' behalf to collect and communicate industry-related information.</p> <p>Decision-making surrounding vine removals, plantings, vineyard management and varietal selection requires reliable information. This is obtained through MVW's involvement in industry forums, annual database survey, crush survey reports, market reports and wine industry data collated by Wine Australia, government and various external agencies.</p> <p>Information is sourced, reviewed and when necessary, summarised for growers' utilisation via information forums, MVW News & Views, MVW Easy Update, MVW Website, MVW Annual Chairman's Report, industry journals and general media.</p> <p>An important source of information comes from growers; answers they provide in the annual Database Information Update Survey, which enables MVW to update and maintain a growers' database for the Murray-Darling & Swan Hill wine regions.</p> <p>Maintaining an accurate database that provides MVW with statistics of grower numbers, area planted to wine grapes, varieties planted, irrigation methods and changes to plantings is essential to MVW's communication with industry and government stakeholders.</p> <p>The database also enables MVW and the Murray Valley Winegrape Industry Development Committee to communicate directly with growers, particularly for time critical matters and for growers to receive invitations to workshops and seminars, news on specific industry-related developments, meeting notices and project voting papers.</p>	
Project Results	<p>Project Results</p> <ol style="list-style-type: none"> 1. Accurate profile of Murray-Darling and Swan Hill wine regions 2. Essential information sourced for use by growers 3. Aggregated regional data for use in submissions to government and sector planning 4. Accurate growers' database that enables direct communication as issues arise

Project Name	Winegrape Crush Report & Price Indications	
Objective(s)	Publish an annual report that itemises winegrape intake by variety, tonnes (grower owned & winery owned), average prices and harvest value, production trends and comparisons with previous seasons. Circulate price indications to growers prior to and throughout vintage	
Project Description	<p>The Murray-Darling / Swan Hill Winegrape Crush Report has been a fixture of harvest reporting for many years. It is the means by which data is collected after every harvest to inform growers of tonnes crushed by variety, average prices and overall value. It also provides a historical record of production for the two regions.</p> <p>Murray Valley Winegrowers (MVW) manages the process in association with Wine Australia, which conducts an Australia-wide post-vintage survey to establish a national production report by variety and purchase price. Data relating to fruit bought in the Murray-Darling and Swan Hill regions is sourced from this survey. Using this data and information collected from past seasons, Wine Australia produces a report specifically for the Murray-Darling and Swan Hill regions.</p> <p>MVW sources and disseminates latest price information estimates periodically prior to and throughout to vintage to keep growers informed of current price offers and to provide growers with an informed commercial decision-making tool.</p> <p>Deliver accessible, relevant & timely analysis of market trends to indicate short to medium term prices for commonly grown varieties in the region.</p>	
Project Results	<ol style="list-style-type: none"> 1. Publication of an annual Murray-Darling / Swan Hill Winegrape Crush Report 2. Annual inventory of winegrape production specific to the Murray-Darling and Swan Hill regions 3. Data for industry planning 4. Price indication information circulated to growers periodically (per ACCC recommendation)

Project Name	Production Support
Objective(s)	To support growers in the selling of their grapes; recording spray applications for pest & disease management; representing growers' interests in the development of national biosecurity strategy for grape vines.
Project Description	<p>Wine Grapes for Sale Register MVW maintains a Wine Grapes for Sale Register to assist non-contracted growers in the selling of their fruit. Growers advise MVW of available varieties and estimated tonnes, creating an inventory of grapes for sale in the Murray-Darling and Swan Hill regions.</p> <p>MVW also maintains records of around 30 wineries known to buy fruit from these regions and periodically communicates details of available varieties, without disclosing individual grower details or available tonnages. If a winery expresses interest in buying grapes, MVW advises all registered growers of that enquiry. It is the grower's decision to follow-up with the winery. This is a service that brings growers and wineries together to facilitate a transaction.</p> <p>Spray Diaries The availability of spray diaries in electronic formats has, for many growers, eliminated the need for a hard-copy spray diary. However, grower demand still exists, resulting in Murray Valley Winegrowers annually updating and printing diaries for use over the season. This project provides a service to growers that are out of contract and do not have access to a winery online spray diary but are required by law to maintain a chemical spray record.</p> <p>Biosecurity management Murray Valley Winegrowers is required to represent the region at federal, state and local levels, participating in the development and maintenance of a national biosecurity strategy.</p> <p>The advancement of regional, state and national biosecurity protocols demand that MVW remain involved in policy-setting forums and communication of outcomes.</p> <p>Governments at all levels expect the Australian viticulture industry to participate in policy development for pest and disease prevention and eradication, meaning that MVW is called on to represent growers' interests in this area of management and control. Through MVW, growers in the Murray-Darling and Swan Hill regions have a say in how these arrangements evolve.</p>

Project Name	Project Preparations, Development & Delivery
Objective(s)	To alleviate costs incurred by Murray Valley Winegrowers (MVW) in researching and preparing submissions to funding bodies; in arranging and attending grower events.
Project description	<p>To operate MVW primarily requires funding support from Wine Australia and Murray Valley Winegrape Industry Development Committee (IDC).</p> <p>From time to time, it may also be necessary to prepare funding applications for submissions to other organisations, e.g. Smart Farm Small Grants program.</p> <p>Most of the services provided by MVW, such as workshops, seminars, field walks, weather stations, information bulletins, production & price data result from funding applications prepared by MVW. They often require a significant investment in preparatory work, research and application preparation.</p>
Project Results	<ol style="list-style-type: none"> 1. Funding to assist MVW in the preparation and development of funding submissions 2. Dedicated income stream

Project Name	Regional Wine Shows
Objective(s)	<p>To benchmark Murray-Darling/Swan Hill wines with those from other inland wine regions.</p> <p>To promote and create greater awareness of Murray-Darling/Swan Hill wines.</p> <p>To understand the limitations and risks associated with the main varieties traditionally grown in the region, especially in view of the impact of global warming and compacted vintages.</p>
Project Description	<p>Australian Inland Wine Show, Swan Hill Wines are judged over the first weekend in October, with medal winning wines presented to the public at the Swan Hill Food and Wine Festival staged over the March long weekend. More than 2000 people attend this event. Many Murray-Darling/Swan Hill wineries enter their wines for judging, along with wineries in the Riverina NSW, Perricoota NSW, and Riverland SA. The process of comparing wines and benchmarking is invaluable to growers and winemakers.</p> <p>Australian Alternative Varieties Wine Show, Mildura AAVWS is held in Mildura each year in November. The aim is to promote wines that other wine shows don't cater for and to identify emerging varieties that have the potential to succeed in the Murray-Darling and Swan Hill regions. The event attracts more than 700 entries and is the largest of its type in Australia. It also attracts the attention of wine and tourism writers and wine buyers, generating considerable publicity for the Murray-Darling and Swan Hill regions.</p> <p>Murray Valley Winegrowers is a sponsor of both events.</p>
Project Results	<ol style="list-style-type: none">1. Heightened awareness of the Swan Hill and Murray-Darling wine regions.2. Identifying varieties with the potential to perform well in these regions, thus creating additional opportunities for growers.3. Benchmarking of local wines against those of other regions.

Project Name	Weather Station Network	
Objective(s)	<ul style="list-style-type: none"> To maintain the Murray Valley Weather Station Network for the purpose of recording regional weather conditions and providing infection alerts to growers Provide growers with access to a live data feed on the MVW website. 	
Project Description	<p>MVW has eleven weather stations stationed in the Murray-Darling and Swan Hill regions, logging temperature, rainfall, relative humidity and leaf wetness. Data from the weather stations is displayed in real time on the MVW website www.mvwi.com.au</p> <p>Growers' ability to access the network gives them the opportunity to assess and manage the risk of disease in their vineyards.</p> <p>The weather station network requires servicing and maintenance, daily conductivity for data access and a service fee for access to the software to run the data in real time.</p> <p>Data is verified by a plant pathologist following a disease model indicator and when necessary, disease alerts are sent to growers via Easy Update email bulletins and SMS.</p> <p>This project aims to maintain grower access to the data and disease indicators produced by the weather station network.</p> <p>MVW plans to further increase the network by adding another two new weather stations, complementing the eleven new stations installed in September 2020.</p> <p>In future MVW plans to have a disease alert app which will deliver information directly to growers in a form which is simple, timely and easy to manage.</p>	
Project Results	Prevention of disease outbreaks; heightened awareness among growers of vine disease pressures; ongoing provision of an effective weather station network.

Project Name	Winegrape Industry Development
Objective(s)	Ensuring the Murray-Darling and Swan Hill regions are represented at state and national levels in all areas affecting wine industry policy development.
Project Description	<p>The Murray-Darling and Swan Hill wine regions of NSW/VIC currently accounts for approximately 23 per cent of the national winegrape production. The area is categorised as one of the “big three”, the other two being Riverina (NSW) and Riverland (SA). Together, these inland regions are responsible for nearly three quarters of the national crush. Wine made from grapes from these regions accounts for around 70 per cent of Australian wine exports. The big three have much in common - similar climatic conditions, grape and wine profiles and consumer markets. They also contribute the biggest proportion of funding to Wine Australia.</p> <p>On matters of winegrape industry policy, research & extension, biosecurity and representation of common issues and concerns, Murray-Darling/Swan Hill, Riverina and Riverland act collaboratively through the Inland Wine Regions Alliance (IWRA).</p> <p>Through Murray Valley Winegrowers, growers are involved in policy development, representation, potential pandemic complexities, wine taxation arrangements, viticulture research & development, vine health, industry code of conduct and market intelligence. MVW gives voice to these and many other matters, representing growers’ in its dealings with:</p> <ul style="list-style-type: none"> • Inland Wine Regions Alliance • Wine Australia • Australian Wine Research Institute (AWRI) • Australian Grape & Wine Inc. (incl. observer Code Management Committee) • Wine Victoria and Wine NSW • Victorian Horticulture Industry Network (HIN) • Regional horticulture industry bodies • Australian Wine Industry Code of Conduct • Victorian and national biosecurity agencies • State & Commonwealth Departments of Agriculture • Australian Competition & Consumer Commission (ACCC) – Agriculture Consultative Committee • ACCC – Wine Grape Market Study and Water Inquiry

Project Applications 2021-22

Agricultural Industry Development Act

Project Results	<ol style="list-style-type: none">1. The interests of Murray-Darling and Swan Hill region growers conveyed in key areas of state and national wine industry policy2. Involvement in policy-development processes at state and national levels in areas that impact on growers' sustainability3. Maintaining an influential role in constructive transformation of the Australian wine industry
